LAKSHITA RAWAT

New Delhi | +91-9717461797 | Email | LinkedIn | GitHub

Data analytics professional with hands-on experience in data analysis, predictive modeling, and dashboard development, delivering actionable insights for business decision-making

TECHNICAL SKILLS

- **Languages:** SQL(Joins, CTE's, Window Functions, Aggregations, Subqueries), Python (Pandas, NumPy)
- **Data Visualization:** Power BI (DAX, KPI dashboards), Tableau (calculated fields), Advanced Excel (Pivot Tables, VLOOKUP/XLOOKUP), PowerPoint
- **Databases:** MySQL, SQL Server, Oracle
- **Analytics:** Time-Series Forecasting (ARIMA), Exploratory Data Analysis (EDA), Hypothesis Testing

WORK EXPERIENCE

IndiGo(via Colliers International) — Technical Executive(MIS) **June 2026 –Present**

- Analyze and consolidate operational data to prepare weekly and monthly **MIS reports,** ensuring accuracy and timely reporting
- Manage and maintain structured datasets and **Excel**-based trackers to support operational reporting
- Collated, validated and analyzed **750+ ESG data** records, **EHS data** while maintaining accurate documentation to support **ISO audits** and compliance reporting

PROJECTS

TransactIQ – Forecasting India's Digital Payments Journey with UPI Link

- Analyzed **10M+** UPI transaction records (2019–2025) using Python (Pandas, NumPy), uncovering **15–20%**seasonal spikes and post-COVID structural shifts in digital payment adoption
- Engineered an **ARIMA** time-series forecasting model (**85%** accuracy **RMSE** based) and used **Power BI** to visualize and project future transaction volumes
- *Key Focus*: Statistical modelling, predictive analytics, AI-enabled insights, and large-scale data analysis

Automated Credit Card Fraud Risk Assessment Link

- Built a fraud detection model on **1.29M+** transactions using **Python and XGBoost**, achieving **97.02% recall** at **37.02% precision**
- Deployed the model as a **FastAPI** scoring service that returns a **0–1** fraud risk score, risk level, and fraud prediction for each transaction via a REST endpoint
- Automated an end-to-end **n8n** workflow connecting the **FastAPI** model to **Google Gemini**, auto-generating case notes for transactions above a **0.70 risk threshold**
- *Key Focus*: Machine learning, API deployment, workflow automation, generative AI, fraud analytics

EDUCATION

University of Delhi – New Delhi **Nov 2022 - May 2026**
Bachelor's Degree in Computer Science(Hons.)

Amrita Vidyalayam – New Delhi **2022**
AISSCE (Science) ***(91.6%)***

POSITIONS OF RESPONSIBILITY

- **Advisor (Placement Cell – Keshav Mahavidyalaya)**- Managed placement data for 200+ students across 10+ drives tracking participation and outcomes

CERTIFICATIONS AND AWARDS

- Data Scientist: Analytics Specialist (Codecademy)
- Google Data Analytics Professional Certificate (Coursera)
- Prescriptive Analytics (IIM Bangalore)
- **BYPL Sashakt Scholar**-Merit-based scholarship awarded by BSES Yamuna Power Ltd. for academic excellence
